Alert of Mobile Device Security

EDuIT urges everyone to be vigilant and proactive in safeguarding your mobile devices and accounts. To protect both personal and the Academy's data, please follow below guidelines if you suspect your device has been hacked:

1. Reset Passwords:	Immediately reset all your passwords, ensuring they are strong and unique.
2. Disconnect Network:	Disconnect your device from any network to prevent further unauthorised access.
3. Run Antivirus Scans:	Perform a comprehensive antivirus scan on both your mobile device and office PC to detect and eliminate any malicious software.
4. Monitor Activity:	Keep an eye on account activity and be caution on suspicious behavior or unknown logins.
5. Update Software:	Ensure that your device's operating system and all Apps are up to date with the latest security patches.
6. Enable Two-Factor Authentication:	Activate Two-Factor Authentication (MFA) if applicable for an additional layer of protection.

You may refer to below website for the good practice of handling user account and password:

https://www.infosec.gov.hk/en/best-practices/person/handling-user-accounts-and-passwords

With concerted effort, we can establish a comprehensive and secure teaching and learning environment, effectively safeguarding the Academy's network system against potential security breaches.
